Education

Faculty of Computers and Artificial Intelligence | Giza Programming | 10/2028

Image Filters Application (C++ / OOP)

Developed a desktop image processing application using C++ and Object-Oriented Programming principles. Implemented multiple filters such as Black & White, Invert, Resize, and other enhancement tools. Optimized performance and designed a user-friendly interface for image loading, editing, and saving.

Audio Player Application (C++ / OOP)

Designed and developed a desktop audio player using C++ with OOP concepts. Implemented key features including play, pause, stop, next/previous track controls, and playlist management. Applied clean class architecture, file handling, and multimedia libraries integration.

Mini Game Application (Flutter)

Built a cross-platform mobile game using Flutter and Dart. Developed interactive user interfaces, implemented game logic, and optimized app performance for smooth user experience. Strengthened skills in mobile development and state management.

Food Recipes Website

Developed a responsive recipes website with modern UI/UX design. Implemented recipe categories, search functionality, detailed cooking instructions, and smooth navigation experience. Improved frontend development skills and responsive web design practices.

Portfolio Website

Designed and developed a personal portfolio website to showcase projects, technical skills, and achievements. Built a modern responsive interface with clean layouts, smooth navigation, and professional presentation.

Strong Skills Gained

Object-Oriented Programming (OOP)

Problem Solving & Algorithms

C++ Application Development

Flutter Mobile Development

UI/UX Design Principle

Web Development Fundamentals

Skills

Communication skills, English, Microsoft excel, Microsoft word, Leadership, Time management, C++, OOP, Python, Problem Solving, Front-End Development, Dart, Flutter, SQL Server Management Studio

Languages

Arabic, English
